

NEW FLYER 8

A WINNER ON ALL FRONTS!

LE GRAND LARGE, GIVRAND, AUGUST 20, 2018

In 2014, Beneteau revolutionized the standards of outboard design with its Flyer range, paving the way for unprecedented habitability and comfort. With the launch of the two Flyer 8 SPACEdeck and SUNdeck boats next September, the range reaches maturity with this new generation of bestsellers.

Reiterating the concept that brought success to Beneteau in the day-boat segment of the powerboat market, the two new Flyer 8s have the same hull development, equipped with Air Step2, which offers quick lift-off, comfort and great stability. The boat comes with two different deck plans and interiors: the SPACEdeck has a central console, while the SUNdeck offers a double cabin under the large sunbathing area.

Extremely spacious and practical, another major feature of the two new Flyer 8 boats is that they are easily transported.

DESIGN AND SPACE

The two day boats are the fruit of a collaboration between Beneteau Power and the Style&Design office and they place the accent on volume and elegant simplicity. A taut and well-balanced line instantly draws the eye and the black pulpits confer the two new models with a boldly modern profile.

Flyer 8 powerboats offer a surprising amount of space and easy movement on board. The clever modular aft bench seat is easy to fold back providing optimum cockpit space. There are also lots of ergonomic storage spaces distributed throughout the boat.

Beneteau has focussed on details and comfort on board, reworking the cabinet work and stainless steel, and offering a selection two different shades of upholstery to match your choice of interior. These top-quality finishes are a demonstration of the boatyard's great expertise.

PRIDE OF PLACE TO SINGLE-ENGINE BOATS

In line with the current market trends, the single-engine boat has much to offer in terms of ergonomics, cost effectiveness and performance. The limited space occupied by the engine makes it easier to move about the stern. The two new Flyer 8 powerboats are also much lighter with a reduction of their light weight of nearly 7%. As for performance, the 350 hp engine power developed in partnership with Suzuki is more than satisfactory with top speeds guaranteed at 43 knots, offering plenty of excitement to thrill seekers!

I SPACEdeck

The Flyer 8 SPACEdeck is extremely versatile and perfectly suited to day boating programmes – swimming, fishing or exploring with the family. The deck plan makes movement on board easy and there is a wide choice of fittings. The optional in-built fishing station replaces the bench seat with a counter, live bait well, rod holder and various other fittings. An elegant fishing T-top completes the fittings, offering effective shelter from the sun and the rain.

| SUNdeck

Ideal for a weekend relaxing with friends, the Flyer 8 SUNdeck has a large sun lounger at the bow, with port and starboard walkways redesigned to make it easier to reach. These large passageways on either side of the driver station make movement on board much safer. This model also stands apart for its top-quality living areas inside. With remarkable headroom, a cabin fitted with a double berth, an independent head, and a galley station, this version outclasses the usual day boat standards, so you will probably decide to enjoy the pleasures of the sea a little bit longer.

The two new Flyer 8s combine fun and simplicity with endless features and they both have a certified capacity of 10 people and can be used with a trailer. Why not come and see them in Cannes from 11 to 16 September and then at all the big upcoming dates this autumn 2018?
