AVANT-GARDE IN BOATING

NEW FLYER9 More inviting than ever!

LE GRAND LARGE, GIVRAND, JULY 2020

This line of BENETEAU day boats is currently in its 6th generation and has a strong history. Now, more than ever, the pleasure of taking helm on this boat is combined with comfort of life on board and ease of navigation.

The Flyer 9 completes the BENETEAU range of day boats. The new model perpetuates the dynamic and elegant features of the Flyer 8, and the level of space and comfort on board are enhanced thanks to optimized design.

*“The Flyer 9 ideally embodies the spirit of the new BENETEAU day-boat range, said **Michaël Guinet**, outboard product manager at BENETEAU. “We have taken the recipe from the previous generation to improve its weaknesses and optimize the strengths. Staying true to Flyer DNA the new boat further optimizes comfort and performance - delivering total enjoyment on the water. Available in either SUNdeck or SPACEdeck versions, the new Flyer 9 builds on the Flyer heritage while demonstrating new levels of innovation and functionality in combination with prominent exterior styling.”*

BENETEAU
AVANT-GARDE IN BOATING

The opening side platform to port is one of the major new features on the Flyer 9, offering sea views and easy access to the water. The innovation is aimed to please even the most demanding water recreation enthusiasts. Another advantage of this platform is that it allows for an expanded cockpit. This increased area echoes the optimized space unique to the full Flyer range.

Swimming for some, sunbathing for others: this is what the Flyer 9 offers with its L shape cockpit, convertible for many uses. As for the outdoor galley, it guarantees extended outings in the best conditions of comfort.

While the Flyer 9 pays special attention to passenger comfort, it does not forget its sporty roots, which it expresses through its sleek lines. Powered by twin Mercury engines, with a maximum horsepower rating of 2x250hp outboards and combined with BENETEAU's famous Air Step®2 hull design, the Flyer 9 guarantees the best in ride performance for its captain and passengers while at sea. The helm is ideally weather protected from the elements by the optional T-Top, and the helm station is optimized with perfect ergonomics for navigation by the captain.

FLYER 9 SUNDECK : SENSE OF WELCOMING

With the Flyer 9 SUNdeck, BENETEAU once again demonstrates its mastery of space on board and further enhances the comfort features of the previous generation. Thus, by adopting the wide port forward Smart Walk around borrowed from the Flyer 10, the Flyer 9 offers excellent accessibility to the spacious front deck, guaranteeing great safety.

While the Flyer 9 SUNdeck can accommodate activities well in its cockpit, it also features a comfortable cabin, which is pleasantly spacious and has two large double berths. The head is another tour de force made by the BENETEAU designers, since it proves to be surprisingly large and is complete with a separate shower.

FLYER 9 SPACEDECK : FLEXIBLE, FUNCTIONAL, COMFORTABLE

Functional and ergonomic, the Flyer 9 SPACEdeck displays impressive modularity with features that will allow her to meet all the expectations of today's boaters, whether it's sunbathing, relaxing with friends, or fishing.

Fishermen will appreciate the innovative bow of the boat particularly suited to their practice: a large unobstructed area on the deck, high gunnels guaranteeing safety, with a reduced height of the bow rails to facilitate casting ... Of course, a fishing station is available as an option, as well as rod holders in the freeboard!

The additional bow seat option will make it a very comfortable front lounge area and is convertible into a large sunbathing platform.

The cabin also reserves its share of unexpected comfort features on an open hull. The interior space is surprisingly large and includes two berths, and a head.

The Flyer 9 adopts the careful attention to detail that contributed to the success of the previous generation of Flyers. This attention to detail is expressed in the quality of the walnut Alpi woodwork and the upholstery. In addition, the various options (ski mast, Bimini on the bow on both versions and rigid T-Top) will further enhance the pleasure of use aboard the Flyer 9.
